

COMPULSORY FIRE INSURANCE PLANNED

PROPOSITION TO RAISE MONEY
BY THE RUSSIAN GOV-
ERNMENT

(By Associated Press.)
PETROGRAD, May 26.—A project to institute compulsory state fire insurance is now under consideration by the minister of the interior, and will be soon presented to the council of ministers for approval. The proposal was first made by the budget committee of the duma, which pointed out the desirability of such a measure as a source of income to the government.

According to preliminary estimates, if this fire insurance monopoly were undertaken by the government, it would yield an annual income of \$15,000,000. The minister of the interior, however, is in favor of the passing of such a measure, not primarily because it would bring a large revenue to the government, but because compulsory insurance is demanded by the condition of the majority of buildings in Russia, which are wooden and but poorly protected against fire. The constant destruction of these wooden buildings by fire has been a perceptible drain on the economic strength of the country.

RICH ORE IN DEPTHS JUMBO EXTENSION

(Continued from page 1)

ayed 8.8 of an ounce of gold, 1.50 ounces silver and a trace of copper, bringing the values up to \$2.40. Four feet higher the real jewelry appeared when a 12-inch streak across the face gave 3.36 ounces gold, 8.80 ounces silver and 5.80 per cent copper with a total value of \$3.28.

This is better than anything in the mine at the same stage of development and there is not the slightest doubt of the opening of the downward extension of the high-grade ore shoot on the 1017 level which would give the Jumbo Extension approximately 500 feet of backs of the richest single body of ore ever opened in Goldfield. This comes close to reaching a world's record. The management has not attempted to make any estimate of the tonnage opened in Goldfield. This comes there has been no crosscutting to block out the existing reserves or to determine their magnitude. On the 884 level where the public was surprised a month ago to learn of the existence of an enormous body of high-grade, the values are starting. When the announcement was made, the shoot had been opened in the shale for a distance of 200 feet. Then the face was in ore that sampled \$319.61 for the full face of five feet. This was on April 19th and

since then the drift has been continued in ore for 50 feet further or over 30 feet greater than Engineer Turner expected.

Last week the returns from this drift showed signs of weakening and the assays dropped to what the Jumbo Extension calls low grade but which for any other mine would be the highest kind of high grade. The values for a width of three and four

feet continued at \$35 to \$45 when suddenly the wonderful ore body expanded and the values came back with the same strength as had been observed in the earlier workings. On this 884 level last night the assays showed 3.24 ounces of gold, 41.20 ounces silver and 18.1 per cent copper, aggregating a total of \$121.60 across a full face of four feet.

The Battle of Health

Success in maintaining the battle line of good health depends largely on the good digestion of nourishing food.

Beer aids digestion, stimulating the secretion of gastric juice. It nourishes because of the carbohydrate elements it contains. Its malt is food; its hops, tonic. It invigorates, soothes and cleanses the entire system.

Schlitz in Brown Bottles Strengthens Your Defense

Made from the choicest materials—it is brewed pure—bottled in Brown Bottles to preserve its purity.

It is the one beer sure to reach your glass, sparkling and crystal clear. It costs no more than beer in light bottles.

See that crown is branded "Schlitz"
